

eCopy ShareScan Connector for EMC Documentum Demo Script

This demonstration script does not cover the general functionality of eCopy ShareScan that should be covered in a demo. This script is intended only as a guide to demonstrating the key functionality of this Connector.

| Function | What You See | Things to Note |
|---|--|--|
| <p>Explain the different options that are available for scanning and distributing documents:</p> <p>Scan to EMC Documentum</p> <p>Press the Documentum button</p> |  | |
| <p>Preview Screen.</p> <p>Press the Next button</p> |  | <p>Dynamically integrates with your existing EMC Documentum Content Server.</p> <p>Here you can preview your scanned document, delete pages, and edit your document settings through the advanced button prior to storing the document.</p> |
| <p>Authenticate by entering your network password.</p> <p>A generic list of users has been created for this demo Version. Select any user by typing in the User Name field.</p> <p>Type any alpha-numeric character or string for Password.</p> <p>Press the Next button</p> |  | <p>User Validation:</p> <p>This Authentication creates an audit trail that leads back to the user, not the copier, and gives access to the Document Management System based on its security policy.</p> <p>Based on the authentication, the user is presented with a specific environment (Cabinets, Recent Folders and Subscriptions) specific to their permissions</p> |
| <p>Select the Doctype that has been scanned.</p> <p>(Doctypes or Types in Documentum determine what index fields the user is to populate for the document)</p> <p>Press the Next Button</p> |  | <p>Each Doctype can be configured for the Connector to limit the number of Doctypes available to users at the scanning device.</p> <p>If one Doctype is configured for the Connector destination this form will be skipped. (Refer to Express Profiles in the eCopy Connector for EMC Documentum Administrator's Guide for more information on how to streamline the scanning workflow).</p> |

| Function | What You See | Things to Note |
|--|--|--|
| <p>Select the Location to save the document: noting the file path at the top of the screen.</p> <p>Filter the search for folders using the filter text field.</p> <p>Back out using the folder up button to show that a location can be selected, then back out and select a different location.</p> <p>Press the Next Button</p> |  | <p>The Connector now shows the locations the authenticated user has access to including:</p> <ul style="list-style-type: none"> - Personal Home Cabinet - Subscriptions - Browse the Repository |
| <p>Select the attributes to save with the document.</p> <p>Press the Send button</p> |  | <p>The document attributes available are listed by the server in real-time and can be configured individually per Doctype. Each can be configured with default values and be modifiable or hidden to the user. (see eCopy Connector for EMC Documentum Administrator's Guide for more information).</p> <p>Major Points to Note: Once the Connector profile is configured, no administration is needed because the Connector is dynamically integrated in real time with the Documentum Server.</p> |
| <p>Depending on audience, demo the ShareScan Administration to show how to configure the eCopy Connector for Documentum.</p> <p>Press the Done button</p> |  | <p>Major Points to Note:</p> <p>Very streamlined and customisable workflow to save documents to Documentum in real time for immediate access.</p> <p>Done will bring you back to the main menu.</p> <p>New Document will allow you to scan a new document based on the same Credentials.</p> <p>New Destination will allow you to send the same document elsewhere.</p> |

Technical Note:

The Connector demo files are located in the corresponding directory based on your version of windows.

Win7: C:\ProgramData\Nuance\ShareScan\Connectors\Documentum\Data\DocumentumDemo.xml

For many of the Demo Connectors, the XML files can be modified to tailor the displayed folders and metadata to replicate your user environment. If you choose to modify this XML data, please save a backup of the original file.
